Introduction to the grade report

Senior school

In this format, we show grades, assignment average, attendance on a grade level, and attendance on a course level.

Attendance (Day count of absent and late)

Days Absent

2

Explain assessment calculations

Assessment criteria can be varied, but it is important to explain how calculations are made.

Assignment average is based on a weighted average using assignment types across a term. Give the weights if needed

- Exam/Assessment = 20%
- Core coursework = 50%
- Class work = 30%

If you have two grade entries, then explain the final mark calculation for learners and guardians.

Mid term assessment 1	25/11/19	100 (50% of total)
End term assessment 2	20/12/19	100 (50% of total)
Final term assessment 3	Term 1	100 (Total)

French 9A
C. Byers; F. Foster

Attendance	87.50
Assignment average	76.67
Effort scale	Met

Teacher feedback

The attendance count is at a course level. If you have set periods to roll call, and entered an attendance status classed as absent, this is shown as Absent/Total periods with status (%).

An override allows Teachers to adjust the Assignment grade book average for the term.

The effort scale uses an achievement scale and can be used to answer simple questions with Yes/No, or give teachers the possibility to assess non academic criteria such as effort, interaction, or Team work.

English 9A
B. Blackburn; T. Teacher
Standard exam grades

Assessment Term 1 (Numerical)	ABS
Effort (Achievement scale)	Met

Teacher feedback

The Grade field is numerical, adjust decimal points, and Maximums for each subject. You can have additional values to designate Absence, Exemption for example.

History 9A
C. Byers

Course level attendance	96.77
Mid term assessment	50
End of term assessment	75
Weighted calculation for total assessment grade	62.5

Teacher feedback

The course level attendance is pulled from the attendance data if courses are scheduled, and classed as roll call. Use the attendance configuration panel to determine the absent/late statuses.

Use a formula assessment type to calculate the weighted final outcome.

Why not add a static text box to explain the calculations and weightings.

This box is for course Teachers to enter rich text comments with formatting.

Maths 9A

K. Ball

Graded Assessment

Term Avg

45.31

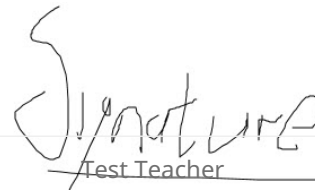

Teacher Comment

Enter a comment to explain the term average.

Include [Hyperlinks](#) to resources used, or information stored outside of myschool.

Grade Teacher comment

This would be a general comment from the class teacher or head of school.
Upload a signature.jpg to the reviewers profile, and confirm in the assessment report configuration.
the report will automatically add this to this section of the report.
